

# m2k is a powerful enhancement to your asset management system.

## KEY FEATURES

- > measurable KPI targets
- > graphical and tabular reports
- > integration with Maximo 4.x and above
- > drill-down reporting
- > applies the features and benefits of SAP Business Objects

## INTRODUCING m2k

m2k enhances the effectiveness of your enterprise asset management system, or Monitor's mpower project cost management system. Whatever the source, it enables the presentation of data in the form of Key Performance Indicators, allowing you to set a variety of measurable KPI targets for activities such as stock control, vendor analysis and work competition.

m2k uses the industry leading reporting tool, SAP Business Objects, combining rapid implementation, drill-down facilities and ease-of-use, with the flexibility to create additional reports from the m2k 'Universe'.

## FOUR SPECIFIC, TAILORED SOLUTIONS

m2k is available in four tailored versions, specifically created for maintenance, inventory, purchasing, and as an enhancement for mpower.

### m2k FOR MAINTENANCE

Allows for analysis of routine maintenance integrity, outstanding work order and backlog work order trends, and provides routine preventative maintenance look-ahead reports.

### m2k FOR INVENTORY

Provides analysis of Inventory Management processes in the key areas of slow and fast moving stock, current balance analysis, catalogue reporting and outstanding reservation review.

### m2k FOR PURCHASING

Delivers detailed reports in the key procurement areas of requisition and purchase order analysis, purchase order expediting and buyer and vendor performance analysis.

### m2k FOR mpower

Enhances the existing reporting facility within the mpower suite by providing a variety of management and user KPI reports.

m2k is a powerful enhancement to your asset management system.

## m2k AND INTEGRATION

m2k has been developed using SAP Business Objects, and shares compatibility with a wide range of systems as well as our own flagship mpower product. This level of compatibility enables easy, quick implementation and means you can continue to benefit from existing investment in software and systems.

## m2k BENEFITS

- enhances your investment in existing systems
- simplifies presentation of data through KPIs
- uses SAP Business Objects
- four tailored versions for specific tasks

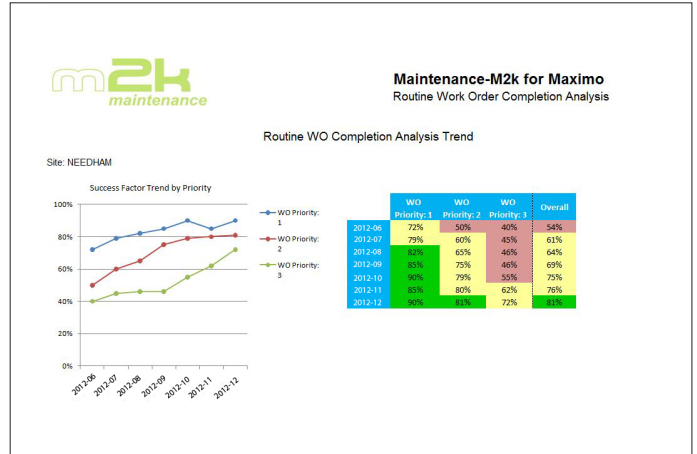

## m2k RESULTS

- you can easily set measurable KPI targets
- review and reporting is easier and more effective
- graphical and tabular reports help communication and clarity

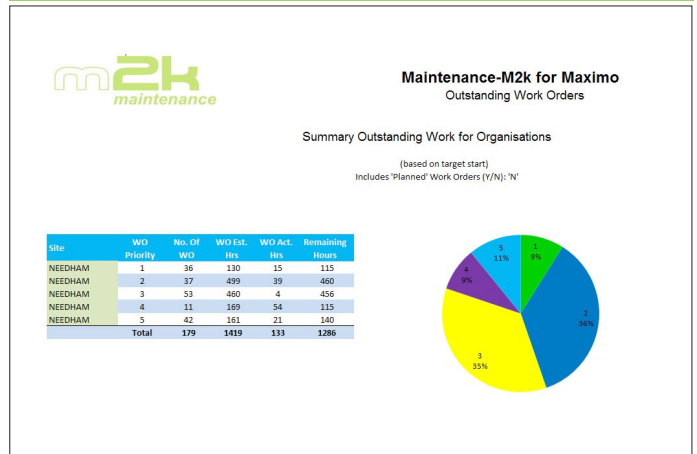

## PUTTING m2k TO WORK

m2k is designed to enhance your use of your existing enterprise asset management systems as well as mpower. m2k uses the industry leading reporting tool, SAP Business Objects, combining rapid implementation, drill-down facilities and ease-of-use. It can be implemented in a matter of hours, with options for training and consultancy from Monitor - either for m2k alone or as part of a combined package with mpower.
